General Information:

I have been employed in field of Film and Television Lighting since 1990.

During this time, I have worked on a large number of projects both here in Australia and abroad. I Have a great affinity with my work and enjoy the challenges, whether they are huge logistical setups moving crew and equipment around difficult locations or small intimate situations that require care and an understanding of actor's requirements. I am experienced in both onset and rigging electrics.

I am also experienced in underwater lighting, having lit numerous sets and yellow screens on many different productions from TV series, commercials, and feature films.

I have owned and operated large gensets and have a vast knowledge of control systems such as dimmers and desks.

Please do not hesitate to contact me for any further references.

CREDITS
